THE LAW IN THE
21ST CENTURY

Event Schedule

APRIL . 16TH TO 20TH . 2018

Harvard Law School
1585 Massachusetts Avenue . Cambridge . MA . USA

The **Harvard Law Brazilian Association Legal Symposium** is an annual congress designed and organized by current students and alumni of Harvard Law School from Brazil. The event will be held at Harvard, in Cambridge, Massachusetts.

We believe that the exchange of ideas is the most efficient way to address the latest social changes confronting Law scholars and practitioners, as a variety of legal problems are germane both to Brazil and the United States. Our goal is to nurture a unique opportunity for networking and learning, by bringing together high-profile speakers, who will put across their lessons about hot-button, legal-related issues to an audience of seasoned professionals and promising students. The result we vow to achieve is to strengthen Brazil's reputation abroad, as well as to provide our participants with valuable perspectives from the international experience.

We also believe that a thorough understanding of the Law in its social context requires that lawyers be exposed to multidisciplinary knowledge. The influx of ideas from other fields is especially pressing in the 21st Century, a time when information is developed and spread at an ever-increasing pace. Not for nothing, some of our lecturers include economists, engineers, computer scientists, and historians, on top of legal professionals and academics from different areas of Law.

Finally, it is our principle that institutions play a pivotal role in fostering social development. We will encourage our guests to explore, in keynote sessions, panel discussions, and workshops, cutting-edge insights into the design of legal devices as a means of making our societies more equitable.

We are confident that, after this event, a message will echo across our nations: **"Institutions drive progress."**
